About This Game

Storyline:

The unlucky traveler left literally for 5 minutes the ship on the planet of woolly beings, and has gone on a visit to the next system. Having returned through couple of tens of thousands years, haven't found the ship on the place - woolly beings during this time have strongly grown bald and have slightly grown wiser.

(it is necessary to tell that the ship has been intended for intergalactic flights and the engine radiated any bad waves - the mutations which have caused in natives).

The grown wiser natives have dragged and have hidden a find, and also by means of scrap and something else tried to crack the ship - but the security system has worked, and in a radius of 50 miles all live has undergone regress - the return evolution.

Gameplay:

Classic style shooter with sci-fi elements and interactive environment. One level - one life. No savings. No any artificial restrictions of movement in location.

Shoot or die. No script's movie scenes and slomo. Day/night cycle.

This is a great add on!

Pros- reskin potential (sorry can't spell), decent sounds (note if you want to do the short horn press the C key), awesome lighting,

cons, engines sounds, cab interior sounds, bad bell sound

overall score 7/10 get on a sale though. Non-essential cosmetic DLC. Great skins for Rama and Red Card, and an okay skin for Joule. **2.5/3. hmmm, I read so many positive reviews of this game. It is indeed a decent shmup, but it didn't get me hooked. No matter which level or what enemies, you always have your same manoeuvres. Gets a bit boring after some levels doing always the same until all enemies are wiped out.. Beat all my expectations, and I expected quite a lot given the reviews. The story is incredible, leaving you feeling very attached to its cast of characters. The price is a touch much for the amount of time it takes to beat the game, though in fairness I'm not a completionist. I enjoyed the story and didnt stray looking for achievements.**

An honest 9/10 story with 8/10 gameplay which is simple yet effective.

Couldnt recommend it more <3. Nomad Games retroactively changes the terms of their contracts. I cannot recommend buying anything from this company nor will I do business with them again.. But seroiusly this skin is awesome!

Cannot get from windows live. Windows Market is no longer allowing download of dlc.. Fun, challenging, and unique. I like it and its concept. But, sometimes frustrating when you lose all your lives and have to play the whole world over again (5 levels in a world). If you like a challenge get it. If you're easily frustrated, don't get it. You'll die a lot in later levels from random difficulty spikes.. It's a great game but the lag is outrageous, if anyone knows how to improve or completely clear all lag in games please spill the beans (tell me please). Greatest music !!! What an amazing rhythm action game. Great variety of music and instruments. Like Rock Band without all the set up and bits of plastic taking up your whole house. It's crashed a couple of times on me (music continues but I'm on the steam loading screen) but that doesn't matter as it's short goes and only takes a moment to reload.

Oh, and it works with Rift perfectly, they should advertise that.

Edit: doesn't seem to crash anymore. Now I like it even more!!! Just buy this game, it's incredible!!!. Great game! I've been watching FF progress since they were making open world title, but when it became released, I decided not to buy it. And now I see this remake, and it's really good even in current state. There are some bugs, but they are not game-breaking, and there's much to do in the game, many places to loot, many combats to fight.

I think game devs made a right decision in the situation with original title. At least now it is really playable and, what's more important, really enjoyable.

So, would I recommend this game? Yes. Even if devs will somehow stop supporting this game, the game in its current state will give you many enjoyable moments, worth more than 10\$ which you originally pay for it. It's a perfect blend of 'Dead State' (minus turn-based combats, but there's an option to pause the game and give orders while the game is paused, in case you need to think over how to deal with danger), 'This War Of Mine' and some other survival game titles.

ps By the way, I saw a line about survival game mode 2014 it seems that these reviews were written before recent update. When I bought this game, it was 30 days to survive, not 20.. Out of the 2016 Halloween DLC the soilder is the best pack by far. If you have the money, buy em all. If you're cheap like me then just get this one.

Soilder DLC gives you an upgradable assault rifle. Other DLC give an upgradable melee weapon. Which is an easy choice.

Hats: are the same stats for all DLC, just different look. If you have the \$ get em all, pick the one you like.

Drone pet gives the targeting stat which is the best out of all of the pets.

Nordic pet is good for health and co-op healing, hammer cool.

Musk Pet gives speed and health which makes this

Pirate pet is good for finding junk, but the huinger stats are boring and not much for pvp.. DayD: Through time. Jurassic Rush is a time/resource management game with dinosaurs and robots! It has nice graphics, okay music and it functions well. You collect resources, remove obstacles, build quarries, sawmills, etc. It's similar to the 12 Labors of Hercules series and is a lot of fun! Pick it up if you are a fan of the genre.. The game hijacks your mouse cursor and doesn't give it back, even if you alt-tab out. It's very bad game design that has no place in the 21st century. I could forgive it if the game had decent puzzle mechanics, but it doesn't. Nothing seems to work in a consistent way. One time you make it to a hilltop, the next time you don't, even though you did the exact same thing. Puzzle games just don't work that way, because you eliminate a methodical approach from even being possible.
